

Newsletter 3: Water, Water, Water! January 17th, 2012

The water project is almost off the ground! The Minerva Fellows have been working hard at finalizing the plans and have a good start on the fundraising for getting running water for the clinic. This is tied into water conservation (rainwater catchment system) and preserving the integrity of the land Engeye sits on (ground drainage routing). We need to start and finish digging before the rains start again. Can you help us buy 5 liters of water? (Go to <http://www.engeye.org/>) Thank you!!

Immunization clinic has started up as well, and the refrigerator is still working well. We are working on the implementation process and getting everyone on the same page with workflow and documentation. We have seen an increasing number of children being brought in for their routine vaccinations and deworming and vitamin A.

We have been keeping an eye out for how other organizations are running their programs and sustainability or empowerment projects, and it has been a very interesting mix. Mainly, location and local need seem to determine what has been implemented and successfully maintained. Our main suggestions for improvement have come to mind when seeing the pervasiveness of our disposable culture. That plastic island in the middle of the Pacific Ocean comes to mind, but it seems so far away from daily life where most people can't afford to buy them anyways.

Along the lines of ecologic stewardship, we're updating the incinerator, which is beyond its last legs, and working on tracking down fire cement. Nightmares of burning plastic and aerosolized dioxins have led to a few changes at the clinic, with better garbage sorting, eliminating disposable plastic cups, and finding reusable alternatives for lab samples (thanks to whoever donated the urine specimen containers!).

IMMUNISATION			
Immunisation protects your child against serious diseases. Follow and complete the immunisation schedule below:			
AGE	VACCINE	HOW TO ADMINISTER	HOW SOON
At Birth	BCG	Intramuscular	Birth
	Polio 1	Oral	Birth
	Polio 2	Oral	10 days
	Polio 3	Oral	28 days
	Polio 4	Oral	6 weeks
	Polio 5	Oral	9 weeks
	Polio 6	Oral	14 weeks
	Polio 7	Oral	19 weeks
	Polio 8	Oral	24 weeks

continue to entertain us with their smiles and antics. Just be careful when picking up the wet-bottomed ones.

Sun is hot!

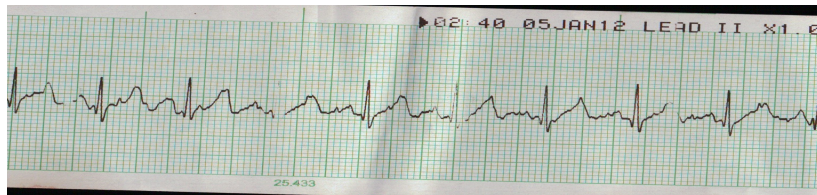

We are also working with Mr. Sam Atia from Kristina Clinic, the new project with our northern friends, associated with the Achon Uganda Children's Fund (<http://achonugandachildren.org/>). Joe has been giving Sam the run down of what inventory and stocking needs are when managing a clinic, and John has been downloading reams of knowledge into Sam's head on clinic work flow and the ins and outs of management. It is exciting to think that a similar community clinic model will be available to the people in the north who have been suffering so long without adequate access to basic health care. This is the region that is still recovering after the violence with the LRA (Lord's Resistance Army) fighting the Ugandan government's military. There are some amazing people doing great work all around the world, and

we appreciate their dedication and perseverance in their missions!

Since the holidays, we have also welcomed our first visiting team of 2012: Ben and Quincy from URGENT (<http://www.urgent-aid.org/>). Fitting their emergency care and training focus, they brought the clinic a donated LifePak10 machine and held an in-training session on its use and care. Eddie volunteered as the live model for the defibrillator demonstration. We held him down good. Just kidding.

Ben and Quincy from URGENT.

Monitor strip from demonstration.

Gotta love DIY-safari...

Vicki on safari with Flat Jacob.

An interesting travel idea for kids: Ben brought his cousin Flat Jacob along with him to travel the world, and they're having a blast! (Look up the children's book... something about a flattened kid who is making the best of his 2-dimensional state.

We have also been working at streamlining airport pickups, and to reduce confusion at Arrivals, we have included a sample of what our visitors to Uganda will be looking for at the airport →

Please also check back soon for: Updates on Noeline and building our next staff housing building.

Thank you! Ω
